

XR9 Series

Unlock Block Lubrication Points

Clear Firearm, Making Sure it is Completely Unloaded.

Wear eye protection WHENEVER working on your firearm.

Your Boberg Arms XR9 series pistol utilizes an unlock block to control and time the rotation of your barrel after firing. This unlock block requires lubrication with a quality anti-seize.

Use a small pea sized amount of anti-seize at the points shown. Apply at each cleaning/re-lubing session.

Take care to use anti-seize that does not contain copper!
